Copilot Analytics

Viva Insights Premium is included in the M365 Copilot license!

Need 50 or more Copilot licenses

It is the full premium experience!

Microsoft Copilot Analytics Overview

The Copilot Dashboard comes with Microsoft 365 Copilot and gives organizations the ability to understand readiness, adoption, impact, sentiment, and learning. This report is geared towards leaders and is ready out of the box.

For customers wanting to go even deeper and customize their analysis, advanced Copilot reporting is available in Viva Insights. Analysts and their designates can use the analyst workbench capabilities in Viva Insights to customize reports.

Copilot Analytics capabilities		Copilot Dashboard ----- <50 Assigned Copilot licenses	Copilot Dashboard ----- >= 50 Assigned Copilot licenses	Advanced Copilot reporting ----- Powered by Viva Insights
Readiness	Tenant-level visibility into Copilot eligibility, licensing, and activation status.	•	•	•
	Microsoft 365 app usage and supporting research to help assess potential impact.	•	•	•
Adoption	Visibility into adoption trends, such as the number of Copilot users, in which apps, and in what ways.		•	•
	Apply filters to adoption trend reports for deeper organizational views.		•	•
	Tailorable advanced capabilities to create custom reports for additional visibility into adoption trends.			•
Impact	Understand the impact of using key Copilot features on key metrics and workplace behaviors.		•	•
	Apply filters to compare Copilot usage and key workplace metrics between groups of Copilot users and between Copilot users and non-Copilot users.		•	•
	Tailorable advanced capabilities to create custom reports for additional visibility into Copilot impact and return on investment.			•
Sentiment	Tenant-level visibility into employee feedback about the value and benefits of Copilot.		•	•
	Visibility into how Copilot user sentiment differs across teams, using a heatmap.			•
Learning	Research and best practices to help throughout the AI journey.	•	•	•
Advanced Reporting	Ability to export Copilot data via Viva Insights Analyst Workbench.			•
	Ability to pull usage data older than 28 days			•
	Ability to filter and group using custom organizational attributes			•
	Business impact report: Ability to pull in third party, functional data, such as sales performance or customer service KPIs, to identify business value correlations			•
	Ability to deploy OOTB Power BI templates or build richer custom dashboards			•
	Ability to customize metric definitions			•
	Ability to segment access to row-level data by attributes or roles using partitions			•

* Copilot Dashboard is included in the Copilot for M365 SKU/service plan)

Copilot can boost productivity in meetings

Microsoft 365 Copilot Chat

Copilot can enhance productivity, save time and reduce effort by providing context-aware assistance, drafting content, summarizing missed information and answering questions, all securely grounded in your work data.

Assess Copilot sentiment for your org

User sentiment is a powerful way to assess how Copilot impacts day-to-day work. Here we provide guidance on how you can assess Copilot sentiment through surveys and share results with your organizational leaders.

Survey Copilot users with Microsoft's suggested template

To measure Copilot sentiment in your organization, we recommend delivering a survey to users (using your survey tool of choice) in which you ask them to indicate the extent to which they agree with the following four statements:

1. Using Copilot helps improve the quality of my work or output
2. Using Copilot helps me spend less mental effort on mundane or repetitive tasks
3. Using Copilot allows me to complete tasks faster
4. When using Copilot I am more productive

Partitions

Partitions are analyst workspaces that only contain certain employee data and attributes.

If you turn on partitions, all analysts assigned to Viva Insights must be manually assigned a partition to access the Viva Insights dataset. [Learn more](#)

☐ Turn on partitions

Minimum group size

This is the minimum number of people that must be in a group for insights to show, and must be at least 5. Group insights appear in Advanced insights and insights for organization leaders.

Suppress email subject lines and meeting titles

When you suppress email subject lines and meeting titles, Viva Insights hides those subjects and titles from appearing in query results. Changes you make here only apply to future queries, and not to queries that analysts in your organization have already run.

- ☒ Suppress all email subject lines and meeting titles
- ☐ Don't suppress any email subject lines or meeting titles
- ☐ Only suppress email subject lines and meeting titles that have these keywords: ⓘ

Organizational data

This page helps you manage organizational data imports and keep track of data import history.

Data connections

📁 Upload or sync data

Set up which data source to ingest organizational data from. You can configure a parallel Microsoft Entra connection for some attributes. [Learn more](#).

Data fields sourced from Entra: Organization and ManagerId. Upload data to enable parallel Entra connection setting.

🔑 Manage access to data fields

By default, all fields including sensitive ones, are available to analysts assigned to the [global partition](#). To restrict access to certain fields for certain analysts, you can create a partition. [Learn more](#)

.csv upload

Uploading organizational data unlocks insights. You'll need to manually upload new data to see updated insights.

Manage

API-based import preview

Importing organizational data from a source system to the Insights API unlocks insights. If you make this switch, you'll remove Microsoft Entra ID as the default data source and allow regular data imports from your new source.

Start

Azure Blob import preview

Importing organizational data from a source system to Azure blob store unlocks insights. If you make this switch, you'll remove Microsoft Entra ID as the default data source and allow regular data imports from your new source.

Start

SAP SuccessFactors preview

Importing SAP SuccessFactors organizational data unlocks insights and allows your data to refresh regularly.

Start

To start off, your data source is Azure Active Directory. Unless you've chosen to overwrite it with another source, Azure Active Directory periodically refreshes values for ManagerId and Organization data fields.

User sentiment in the Copilot Dashboard

Employee sentiment about Copilot

"Copilot survey" has 140 respondents between Nov 2, 2024 and Nov 8, 2024.

...

*Results are the percentage of users who agree with each statement. Benchmark results are based on a worldwide survey of Copilot users by Microsoft. [Learn more](#)

Employee sentiment about Copilot

"Copilot survey" has 140

Suggested Copilot survey questions

To measure Copilot user sentiment in your organization, we recommend delivering a survey to users in which you ask them to indicate the extent to which they agree with the following four statements:

- *Using Copilot helps improve the quality of my work or output*
- *Using Copilot helps me spend less mental effort on mundane or repetitive tasks*
- *Using Copilot allows me to complete tasks faster*
- *When using Copilot I am more productive*

For each of these, we recommend allowing users to indicate whether or not they Strongly Disagree, Disagree, Neither Agree Nor Disagree, Agree, or Strongly Agree with the statement. You can then combine the "Agree" and "Strongly Agree" responses to compute the % of users who agreed with each statement and compare results with the Microsoft benchmarks shown in this tab.
